Re: Grant Parole to PF Lazor, C-73842

L. Romero, C&PR

This letter is to update my previous letters to support the granting of parole to Mr. PF Lazor

I have known Mr. Lazor for almost thirty years. He was a student of mine at Ohlone Community College in Fremont, California in the Merchandising Department for several years. I came to know him well as his major advisor and professor.

He had outstanding character traits that brought him to ones attention both as a student and during departmental activities. His kind and soft spoken nature in working with staff and other students made him well liked and accepted. He is a talented and creative person with great sensitivity toward other human beings. He never displayed any violent tendencies or anger during our association. For these reasons, it is impossible for me to see him unjustly incarcerated as a danger to society. He simply does not fit such a profile! Not even 22 years of prison life have destroyed these good qualities.

It is long overdue that Mr. Lazor be pardoned for a tragedy of self defense. I, too, want true criminals to stay behind bars but he is not one of them! It is within your power to give this man his life back so he can return to society as a productive and responsible citizen.

He continues to maintain an intelligent and compassionate approach to life and those around him. I am confident he will fit into society and be a self supporting and contributing member upon release.

By law he could have been released in 1992 unless he is a danger to society. Since that is not true, it is time for justice to be served. Please grant parole to PF Lazor..

Most sincerely,

Colleen M. Carr
Professor Emeritus
Ohlone Community College
