James Nielsen, Chairman  
Board of Prison Terms  
428 J Street, Sixth Floor  
Sacramento, CA 95814

Dear Mr. Nielsen and Board Members:

RE: JOB SKILLS FOR PAROLE FOR PF LAZOR, C-73842

This is in regard to my son, PF Lazor, for parole from prison.

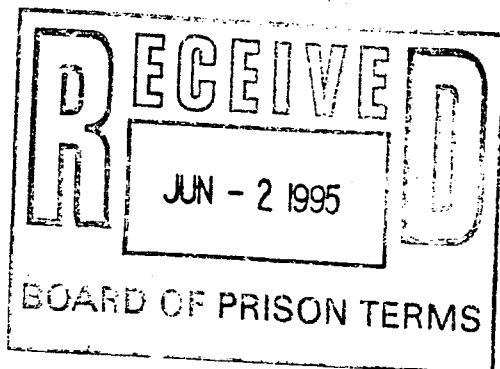

My son worked for me in the summers from the time he was 8 or 10 years old, learning brick and block masonry skills, while he served as a laborer with his brothers. He did this work in summers until he was about 17 years old, on a regular basis, and occasionally for a few years after that. During this time, he developed these skills very well. He also developed many related construction skills, including working for concrete and roofing and carpet laying contractors, and carpentry work on occasions.

PF also developed brick and block laying skills on his own over the years, and even applied these skills in prison. (See positive prison reports about this).

PF has not chosen construction as his primary work in life, but this is to confirm that he does possess these skills and has the training, for something to always fall back on if ever needed. He has always been willing to apply these job skills when the opportunity or need arises.

Sincerely,

John Lazor, Sr.  
Career brick mason  
Over 50 years experience

*John Lazor*
